

# Household-material comparison - comparison sheet

Compare the same feature for A and B. Include units with measurements.

|                          |                          |
|--------------------------|--------------------------|
| Question being compared  |                          |
| <div></div>              |                          |
| Item A / condition A     | Item B / condition B     |
| <div></div>              | <div></div>              |
| Material reference - A   | Material reference - B   |
| <div></div>              | <div></div>              |
| Thickness measured - A   | Thickness measured - B   |
| <div></div>              | <div></div>              |
| Flexibility observed - A | Flexibility observed - B |
| <div></div>              | <div></div>              |
| Surface texture - A      | Surface texture - B      |
| <div></div>              | <div></div>              |
| Weight if measured - A   | Weight if measured - B   |
| <div></div>              | <div></div>              |
| Use idea - A             | Use idea - B             |
| <div></div>              | <div></div>              |
| Common features          | Observed differences     |
| <div></div>              | <div></div>              |
