

Paper Wrist Cuff wearable craft project

ex2-1192 / LETTER / Parts overview - NOT A CUTTING SHEET

USE THE FOLLOWING PATTERN SHEETS AT ACTUAL SIZE.

These miniature views identify the supplied patterns; they are deliberately reduced.

1. Pattern 1

1 pattern sheet supplied. Printed details are not cut lines unless explicitly marked.

Solid cut boundary / dashed score / shaded joining area. Read the full instructions.

Dry-fit the parts before gluing. Keep this overview beside the full-size pattern sheets.

Print at actual size / 100%. Disable fit-to-page.
Use the paper edition that matches the printer tray.

Paper Wrist Cuff wearable craft project

ex2-1192 / LETTER / Instructions

PURPOSE

Paper Wrist Cuff wearable craft project developed as a measured original paper study. The packet provides the actual parts, joining or shaping marks, drawing dimensions and an assembly sequence. Print at actual size and dry-fit the parts before gluing.

DRAWING FACTS

- Three 175 x 25 mm joining bands, each with a 15 mm overlap; fitting is user-measured, not age-sized.

MATERIALS

Plain 100 to 140 gsm paper for a first dimensional trial; approximately 160 to 220 gsm card only after confirming the folds. Use a ruler, suitable scissors, a blunt scoring tool and a small amount of paper adhesive. An adult should handle internal cuts, holes and small fasteners.

HOW TO USE THESE PAGES

1. Cut the bands and decoration, scoring any indicated attachment folds.
2. Join only as many strips as needed for a loose measured trial; trim spare length before fastening.
3. Place the decoration on the outside, with all joins smooth and no sharp fasteners against skin.
4. Keep the finished band loose and easily removable. Use only the strips needed for the measured trial, with smooth joins and no exposed sharp fasteners.
5. No universal child sizing or toy-safety approval is supplied. Use appropriate supervision and stop use if paper tears or interferes with sight or movement.

LIMITS AND CHECKS

- Drawing dimensions describe flat paper surfaces, not verified internal capacity, load strength, fit or material compatibility.
- No mailing, food-contact, archival, toy-safety, protective-wear or cutting-machine certification is supplied.
- Make a plain-paper trial first; paper thickness and fold accuracy can change the fit.
- Trial: Measure the 50 mm reference and two named component dimensions.
- Trial: Make a complete empty trial and document fold direction, joining order, collision, stability and any fragile features.
- Trial: Repeat the trial using your chosen paper. Check that every join holds and each moving part works freely before decorating.

50 mm print check

Print at actual size / 100%. Disable fit-to-page.
