

Jewelry Card Insert package specialty project

ex2-1248 / LETTER / Parts overview - NOT A CUTTING SHEET

USE THE FOLLOWING PATTERN SHEETS AT ACTUAL SIZE.

These miniature views identify the supplied patterns; they are deliberately reduced.

1. Pattern 1

1 pattern sheet supplied. Printed details are not cut lines unless explicitly marked.

Solid cut boundary / dashed score / shaded joining area. Read the full instructions.

Dry-fit the parts before gluing. Keep this overview beside the full-size pattern sheets.

Print at actual size / 100%. Disable fit-to-page.
Use the paper edition that matches the printer tray.

Jewelry Card Insert package specialty project

ex2-1248 / LETTER / Instructions

PURPOSE

Jewelry Card Insert package specialty project developed as a fixed-size paper pattern with separate cut, fold and joining marks. Use the stated drawing sizes and make an empty trial before choosing material or contents.

DRAWING FACTS

- Presentation card: 85 x 110 mm. Marked attachment locations are design positions, not retention/load ratings.

MATERIALS

Plain paper for a first trial, a ruler, scissors and a blunt scoring tool; adult help for internal cuts.

HOW TO USE THESE PAGES

1. Cut the card and the marked holes and short vertical slits.
2. Write the item name, then place an expendable jewelry sample through the openings without stretching them. Close any sample fasteners behind the card.
3. Support the card upright on a separate stand and check that the sample does not slip or mark the paper.

LIMITS AND CHECKS

- Nominal drawing dimensions are not a tested usable-capacity, load, mailing, food-contact or archival specification.
- Do not place valuable, wet, hot or breakable items in an unreviewed paper prototype.
- Trial: Measure the 50 mm reference and at least two named panel dimensions.
- Trial: Assemble an empty plain-paper trial; record closure, seam, clearance and material behavior.

Print at actual size / 100%. Disable fit-to-page.
Use the paper edition that matches the printer tray.
