MAKE THE PROJECT

A 90 x 125 mm two-pocket sample folder with four 72 x 48 mm mounting cards and a notes panel.

CONSTRUCTION SCHEMATIC

MATERIALS

Plain paper for a first trial; suitable light card for the final piece; ruler, scissors, blunt creasing tool and paper adhesive. Use appropriate adult help with cutting and small joining parts.

- 01** Cut the folded cover, pockets and four mounting cards. Keep pocket tabs and do not cut the writing rules.
- 02** Fold the cover and mount the two pockets on its inner faces, gluing only the side and bottom tabs.
- 03** Attach a small lightweight swatch to the blank upper area of each mounting card using an appropriate removable method.
- 04** Write source, date and material notes below the sample. Do not infer lightfastness, fire performance or composition from the paper record.
- 05** Put two cards in each pocket for a trial. Bulky fabric or layered materials may need a wider spine than this flat folder.

Print at actual size and check the 50 mm scale. SVGs are editable vector masters; cutting-machine compatibility is not certified.
