

Mini gusset gift bag

One body net / solid = cut / dashed = fold / shaded = attach

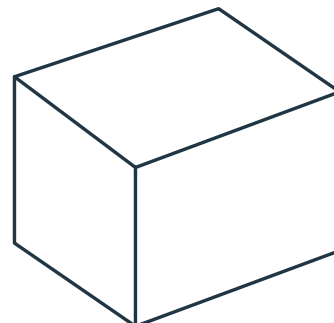

Wall panels in order: 52, 26, 52, 26 mm. Wall height: 78 mm. Side overlap: 8 mm.

Mini gusset gift bag

Assembly guide / print at 100% / check 50 mm / physical trial required

MAKE THE PROJECT

A small 52 x 26 mm flat-bottom bag with 78 mm walls, inward side creases and a fold-over top hem.

CONSTRUCTION SCHEMATIC

MATERIALS

Plain paper for a first trial; suitable light card for the final piece; ruler, scissors, blunt creasing tool and paper adhesive. Use appropriate adult help with cutting and small joining parts.

- 01** Cut the single body net, preserving its bottom flaps and side tab. The narrow walls have an extra center crease for inward gussets.
- 02** Crease the wall hinges, narrow-wall center lines, top hem and bottom lines before joining the seam.
- 03** Fold the 8 mm top hem inward. Glue it flat, then join the side seam behind the opposite edge to form a tube.
- 04** Fold both narrow bottom flaps inward. Close the first wide flap, then glue the second wide flap over it, holding the bottom square while it sets.
- 05** Push the narrow wall centers inward to make the bag flat above its base. A ribbon or sticker may hold the top closed; no handle strength or reusable closure is promised.

Print at actual size and check the 50 mm scale. SVGs are editable vector masters; cutting-machine compatibility is not certified.
