

Voucher presentation folder

Cover / opposite corner pockets and message insert

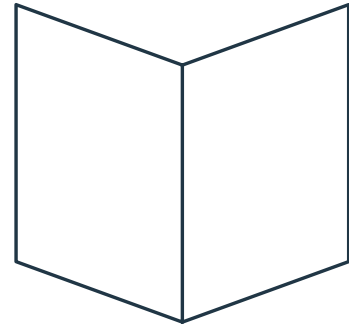

Voucher presentation folder

Assembly guide / print at 100% / check 50 mm / physical trial required

MAKE THE PROJECT

A 90 x 65 mm folded presentation card with diagonal corner pockets and a removable 80 x 55 mm message insert.

CONSTRUCTION SCHEMATIC

MATERIALS

Plain paper for a first trial; suitable light card for the final piece; ruler, scissors, blunt creasing tool and paper adhesive. Use appropriate adult help with cutting and small joining parts.

- 01** Cut the folded cover, message insert and two corner-pocket triangles.
- 02** Fold the cover at its center. Crease each triangle along its two marked 5 mm tab lines; leave its sloping side open.
- 03** Glue one corner pocket near the lower-left inside corner and the other at the upper-right. Use the alignment marks so the insert seats between them.
- 04** Write on the message insert or use it as a size-check card. Slide only its opposite corners under the pockets.
- 05** Test the fit with the intended voucher before final mounting. The template is for presentation and does not create a redeemable offer.

Print at actual size and check the 50 mm scale. SVGs are editable vector masters; cutting-machine compatibility is not certified.
