

Pin badge presentation cards

Two display cards / cut lines and puncture positions

Pin badge presentation cards

Assembly / solid = cut / dashed = fold

MAKE THE PROJECT

Two 75 x 95 mm pin presentation cards with item-specific slit or hole positions.

YOU WILL NEED

Light card, scissors, ruler, small hole tool and a protected work surface. Sharp tools require suitable adult supervision.

- 01 Cut the two card outlines; the upper round mark is an optional hanging hole.
- 02 Make the marked interior cuts or punctures over a protected cutting surface. Interior solid lines are cuts, not folds.
- 03 Start with only the puncture marks needed for your pins. Keep pin backs secured and protected on the reverse.
- 04 Check fit with the intended item before producing a batch. These decorative cards are not protective packaging and make no shipping or weight-bearing promise.

Try the pattern on ordinary paper first. Nominal fold dimensions exclude paper thickness. No physical assembly, load-bearing, food-contact or shipping performance has been verified.
