

Gift-envelope wax-seal backing shapes

Gift-envelope wax-seal backing shapes

Assembly and use / Print at actual size / Make a plain-paper trial

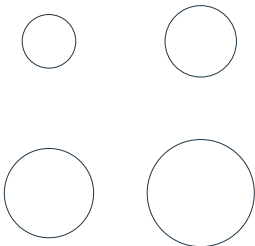

MAKE THE PROJECT

Cut circular backing pieces for a separately made decorative wax seal.

YOU WILL NEED

Matching printed sheet; ruler; pencil; scissors. Additional materials are identified in the steps.

50 mm scale check | Measure after printing

TEMPLATE REFERENCE

- 01 Print at 100% and check the reference if the backing size matters. Choose a circle larger than the intended seal.
- 02 Cut the circle along its outer border. Make a scrap trial with the actual seal and adhesive before using the final backing.
- 03 Follow the seal material's instructions on a suitable work surface. Use a finished, cooled seal on the paper backing.
- 04 Attach the completed backing to the gift envelope after checking that its edges remain supported.

Wax, heating equipment and adhesive are not supplied. Follow their handling instructions; paper backing does not make hot wax safe to touch.
