

Rectangle area and perimeter mini-pack

Find each rectangle's area and perimeter. One square side is 1 unit.

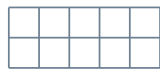

1. 3 units by 4 units

Area: _____

Perimeter: _____

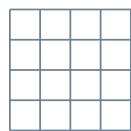

2. 5 units by 2 units

Area: _____

Perimeter: _____

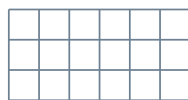

3. 4 units by 4 units

Area: _____

Perimeter: _____

4. 6 units by 3 units

Area: _____

Perimeter: _____

Rectangle answers

One square = 1 square unit; one side step = 1 unit.

1. Area = 3 x 4 = 12 square units

Perimeter = 2 x (3 + 4) = 14 units

2. Area = 5 x 2 = 10 square units

Perimeter = 2 x (5 + 2) = 14 units

3. Area = 4 x 4 = 16 square units

Perimeter = 2 x (4 + 4) = 16 units

4. Area = 6 x 3 = 18 square units

Perimeter = 2 x (6 + 3) = 18 units

Area counts square units. Perimeter measures the outside boundary.
