

Layered pennant bunting

Sheet 1 / Two outer flags and two inset layers / Solid = cut; dashed = fold

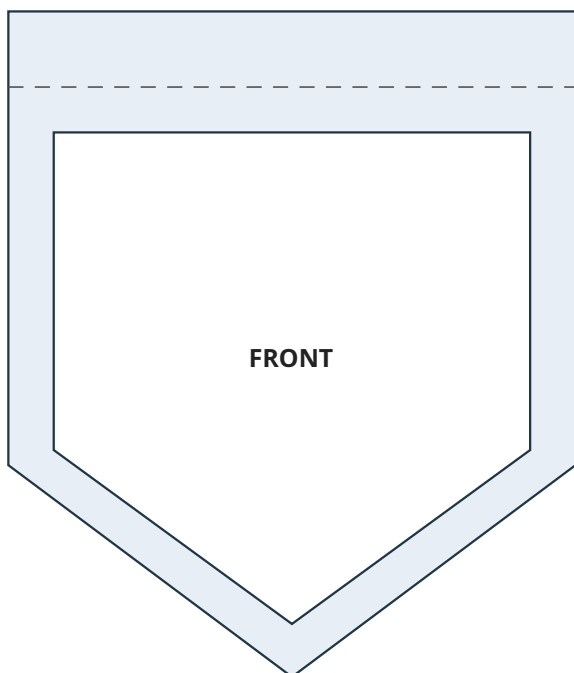

INSET LAYERS / use a second color if desired

Layered pennant bunting

Sheet 2 / Alignment, joining and hanging sequence

The inner layer sits 6 mm from each side and 6 mm below the flap fold. Its point stays 7 mm above the outer point.

Only the top 10 mm flap folds. The smaller front layer is flat.

1. Print at actual size and check the 50 mm line. Cut the four outer silhouettes on page 1.
2. Add a message to each inner layer. Position it as shown, leaving the hanging flap clear.
3. Glue the inner layer to the front using a thin, even paper adhesive. Allow it to dry flat.
4. Score the dashed top line and fold the flap backward over string. Secure the flap to the back, not across the visible front.
5. Make one trial flag before preparing a long run. Hang out of reach of young children; this is a paper decoration, not a toy.
