

Concertina card and photo display

Full-size cutting template / keep all fold guides

Concertina card and photo display

Assembly / solid = cut / dashed = fold

MAKE THE PROJECT

A 180 x 120 mm concertina base with panel widths 45, 45, 45, 45 mm.

YOU WILL NEED

Paper or light card, scissors, ruler and a blunt scoring tool; adhesive for added panels.

- 01 Cut around the outer rectangle. Score only the dashed fold lines before decorating the blank panels.
- 02 Alternate valley, mountain and valley folds so the four panels stack.
- 03 Use as a four-panel message card or photo display. Add lightweight inserts smaller than each 45 x 120 mm panel.
- 04 Check the finished folds on scrap first. These dimensions do not establish compatibility with a commercial card or envelope size.

Try the pattern on ordinary paper first. Paper thickness, folds and joins affect the result. The digital layout is checked; physical assembly and durability remain untested.
