

Three-hole pamphlet-stitch notebook guide

Piercing guide for a small folded signature

Finished nominal leaf: 90 x 120 mm. Hole spacing: 40 mm. This is a piercing guide, not pre-punched paper.

Three-hole pamphlet-stitch notebook guide

Assembly / solid = cut / dashed = fold

MAKE THE PROJECT

A three-hole, 40 mm-pitch pamphlet-stitch guide for one 90 x 120 mm folded signature.

YOU WILL NEED

A few sheets of paper, scissors, ruler, thread, needle or awl, and a protected piercing surface.

- 01 Cut a small stack of sheets to 180 x 120 mm and fold them together at the center to form one signature.
- 02 Use the printed guide over the folded stack. Pierce the three marked positions carefully over a protected surface; a sharp needle or awl requires suitable supervision.
- 03 Start inside at CENTER, leaving a tail. Pass out through CENTER, then in through TOP.
- 04 Pass from inside to outside through BOTTOM, then back inside through CENTER. Do not pierce the thread already in that hole.
- 05 Place the two tails on opposite sides of the long inside stitch, tie them together, and trim only after testing the knot.

Try the pattern on ordinary paper first. Paper thickness, folds and joins affect the result. The digital layout is checked; physical assembly and durability remain untested.
