

Adjustable paper crown strips

Two joined strips per sheet / print a second sheet as needed

Adjustable paper crown strips

Assembly / solid = cut / dashed = fold

MAKE THE PROJECT

Two 164 mm crown strips per sheet, each with a 20 mm joining zone and six triangular points.

YOU WILL NEED

Light card, scissors, paper tape and a flexible measuring strip.

- 01 Cut the strips, keeping the 20 mm end joining zones. Decorate while the strips are flat.
 - 02 Print another copy if the intended circumference requires more strips. Test a loose paper band first rather than assuming an age-based size.
 - 03 Join successive strips with at least 20 mm overlap. Three strips provide up to about 432 mm circumference; four provide up to about 576 mm before additional fit adjustment.
 - 04 Close the band with tape on the outside only after checking a comfortable, easily removable fit. Do not add tight elastic or cord.
 - 05 Use as a temporary supervised paper decoration. Do not cover the wearer's eyes or use during active play.
-

Try the pattern on ordinary paper first. Paper thickness, folds and joins affect the result. The digital layout is checked; physical assembly and durability remain untested.
