Paper photo-prop handle sleeves

pap-153 / A4 / INSTRUCTIONS / 2 of 2

Three square-section paper sleeves for a rounded paper handle or a small paper display stem.

DIMENSIONS

Three nets: 45 x 65 mm.

Four side panels: 10 mm each; joining flap: 5 mm.

Nominal section: 10 x 10 mm before material thickness.

MAKE A PLAIN-PAPER TRIAL

- 01 Cut the three rectangular sleeve nets. Score the four long fold lines on each.
- 02 Fold the four equal panels around an empty 10 mm square section.
- 03 Apply adhesive only to the 5 mm flap and join it behind the opposite edge.
- 04 Let the sleeve dry before inserting a rounded paper handle dummy. Do not force a tight or sharp object into it.
- 05 Attach the sleeve to the back of a light paper prop using a broad paper tab. Test the join before use.

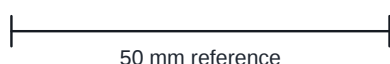

MATERIALS

Ordinary paper for a first trial; scissors; ruler; a blunt scoring tool; a small amount of paper adhesive.

BEFORE YOU USE IT

Not a rigid-tool handle, child-safety grip or load-rated attachment.

Solid boundary = cut. Long dashes = fold/score. Dots = positioning guide. Pale grey = joining area. Keep tabs attached. Adult help is needed for internal cuts.
