

Community seed library kit

Project pack / Component files and their use order

A USEFUL SET, IN ONE PLACE

This packet gathers the resources listed below. Use the individual pages as needed; included planning sheets do not replace specialist instructions.

01	Community seed library labels	2
	1 page	
02	Seed-sharing packet with collection fields	3
	2 pages	
03	Seed collection inventory	5
	1 page	
04	Seed swap table signs	6
	3 pages	

PRINT AND USE

Select the same paper size throughout the packet. Use actual-size printing for cutouts or grids. Check each resource's own reference marker where supplied: lengths can differ.

For cutting or assembly, make one trial first. Keep instructions and answer pages with their matching resource. These components are reused intentionally; the pack is a convenience collection.

Community seed library labels

86 x 54 mm cut outlines / No branded sticker-stock compatibility claimed

Seed-sharing packet with collection fields

Nominal panel 60 x 90 mm / Solid = cut, dashed = fold / Trial-fit your contents

See the second page for folding, gluing and trial-fit instructions.

Seed-sharing packet with collection fields

Construction notes / Use with the matching template page

01 / Prepare

Print at actual size and measure the 50 mm line. Make the first packet with a spare sheet. Complete Seed, Variety, Collected and Shared by while the sheet is flat.

02 / Cut

Cut the solid outer silhouette. Keep both narrow side tabs, the lower front panel and the top closure flap attached. Do not cut the dashed fold lines.

03 / Dry-fold

Crease the four dashed lines. Fold the two 10 mm side tabs inward, then bring the lower 80 mm front panel up against them. Check the printed face and opening before applying adhesive.

04 / Join

Apply a thin line of paper adhesive where each side tab meets the front panel. Press the two side joins and let them dry. Leave the top opening and 28 mm closure flap free.

05 / Check the pocket

The back panel is 60 x 90 mm; folds reduce the usable space. Check the bottom corners and side joins for gaps. Trial the packet over a tray with a few seeds of the intended size.

06 / Fill and close

Use dry seeds and leave room to fold the top flap. Close it over the opening and secure it. Add a small inner paper fold if seeds escape during the trial; label it with the same seed details.
