Print at actual size / 100%. Disable fit-to-page.
Use the paper edition that matches the printer tray.

Constellation planning cutouts

ste-118 / LETTER / Instructions

PURPOSE

Original drawing reference showing an invented star-connection planning map. Use the sheet for tracing, coloring or planning. It is not a cut-every-line stencil.

DRAWING FACTS

- Main drawing field: 170 x 170 mm, centered without resizing between Letter and A4.

MATERIALS

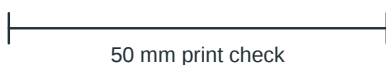

Plain paper for a first trial, a ruler, scissors and a blunt scoring tool; adult help for internal cuts.

HOW TO USE THESE PAGES

1. Print at actual size and measure the 50 mm reference line.
2. Place tracing paper over the pattern or work on the printed sheet. Copy the dark marks as drawing lines.
3. For a layered composition, decide the cut boundary on a separate sketch first; tracing marks do not promise retained connections.
4. Keep a master sheet and test the intended material before using the design on a finished project.

LIMITS AND CHECKS

- Invented layout, not a map of named constellations or an astronomical reference.
- Tracing-only layout; no bridged-stencil or retained-material claim is made.
- Trial: Confirm line continuity and usable line spacing after printing.

50 mm print check

Print at actual size / 100%. Disable fit-to-page.
